<p>Description of Activity</p>	<p>Share the Visitor aggregator URL (https://aggregator.visitor-project.eu/) with your students and ask them to collect some artefacts which inspire them to write a short story or to narrate a story they have read—inside or outside school. Help them to focus on the characters and plot and highlight that they have to explain how those artefacts shifted their thinking. What did they see, understand, or believe and want to share ?</p> <p>Consider offering an example from your own experience to illustrate how students might similarly be inspired. Explain that the rest of the lesson will explore how art can influence how we think in meaningful ways, both personally and as community members.</p>
